

## Curriculum vitae Giuliana Giribaldi

### Personal details

Born in Turin (Italy)

Nationality: Italian

Email: giuliana.giribaldi@unito.it

Website: -

ORCID ID: 0000-0003-1374-1919; Scopus ID: 6602374059; Researcher ID: I-8115-2018

### Educations

1991-1995: Ph.D. in Biochemistry, University of Torino Medical School.

1990: Master in Biological Sciences, University of Torino School of Sciences, Torino Italy

### Professional experiences and current position

2022-today: Associate Professor of Clinical Biochemistry, University of Turin Medical School

2006-2022: Researcher and Professor of Biochemistry, University of Turin Medical School

2003: Researcher in medical biochemistry, Department of Genetics, Biology and Biochemistry, University of Torino Medical School.

1997: Technician, Department of Genetics, Biology and Biochemistry, University of Torino Medical School.

1996: Postdoctoral Fellow, Department of Genetics, Biology and Medical Chemistry, University of Torino Medical School.

1991-1995: Ph.D. Student in Biochemistry, University of Torino Medical School.

Subject: Metabolism of Nitrogen Compounds in Rat Hepatocytes.

1990-1991: Postgraduate Fellow, Department of Genetics, Biology and Medical Chemistry, University of Torino Medical School. Subject: Mechanism of Hemolysis in Thalassemia and Glucose-6-Phosphate Dehydrogenase Deficiency.

1988 - 1990: Master Studies, Department of Genetics, Biology and Medical Chemistry, University of Torino Medical School. Subject: Mechanism of Hemolysis in Glucose-6-Phosphate Dehydrogenase Deficiency.

### Participation to Directive Boards of Scientific Societies and/or Institutions:

Member of *Editorial Board* of Journal of Bacteriology and Parasitology (ISSN: 2155-9597)

### Honors

22/09/2006: SIBIOC Best Poster winner, Turin, 38th Congress SIBioC

13/06/2009: Best Poster winner, II Giornate Piemontesi dei Giovani Internisti, Turin, Italy

14-18/10/2013: "Best Poster Award" winner abstract 42, Second Conference on nanotechnology for Biological and Biomedical Applications (Nano-Bio-Med 2013). Trieste, Italy

### Teaching activity:

2006-today: **Professor of Biochemistry, University of Turin Medical School, degree course in Techniques of Neurophysiopathology**

2012-oggi: **Professor of Clinical Biochemistry, University of Turin Medical School, degree course in Biomedical Laboratory Techniques**

2018-today: **Professor of Biochemistry, University of Turin Medical School, degree course in Nursing**

2019-today: **Professor of Clinical Biochemistry and Clinical Molecular Biology, University of Turin Medical School, post-lauream graduate school of Medical Genetics**

2019-today: **Professor of Clinical Biochemistry and Clinical Molecular Biology, University of Turin Medical School, post-lauream graduate school of Hygiene and Preventive Medicine**

### Research main topics

Biological effects of nanomaterials promoting wound healing in hypoxia-associated pathologies.

Identification and validation of tumor markers in urological cancers.

### Main projects as PI:

- 1) A new quantitative strategy for the molecular assessment of minimal residual disease in non-Hodgkin's lymphomas. Ricerca sanitaria Finalizzata Regione Piemonte 2002
- 2) Real time PCR for the quantification of residual malignant cells in B-CLL subjected to CAMPATH-1 immunotherapy. Ricerca sanitaria Finalizzata Regione Piemonte 2003
- 3) A new consensus strategy using "MGB-PROBES" for quantification of MMR in patients with CLL-B. Ricerca Sanitaria Finalizzata Regione Piemonte 2004
- 4) Identification by proteomic techniques and diagnostic validation of new tumor markers in bladder cancer. Bando regionale sulla ricerca scientifica applicata (CIPE) per l'anno 2004 nei settori: Salute e scienze mediche, Qualità e sicurezza alimentare, Ambiente, Nanotecnologie e nanoscienze, Aeronautica e spazio.
- 5) Study of the combined effect of anthracyclines and bortezomib in a mouse model of xenograft with human neuroblastoma cells. Ricerca sanitaria Finalizzata Regione Piemonte 2009
- 6) Development and validation of new diagnostic methodologies. Convention with Nurex s.r.l. Sassari 2011/2012

**Bibliometry (1994-present)** ([www.scopus.com](http://www.scopus.com))

28

**10 best publications**

- 1) E. Schwarzer, F. Turrini, D. Ulliers, G. Giribaldi, H. Ginsburg and P. Arese  
Impairment of Macrophage Functions after Ingestion of *Plasmodium Falciparum*-infected Erythrocytes or Isolated Malarial Pigment  
The Journal of Experimental Medicine (1992), 176, 1033-1041
- 2) D. Ghigo, R. Todde, H. Ginsburg, C. Costamagna, P. Gautret, F. Bussolino, D. Ulliers, G. Giribaldi, E. Deharo, G. Gabrielli, G. Pescarmona and A. Bosia  
Erythrocyte stages of *Plasmodium falciparum* exhibit a high nitric oxide synthase (NOS) activity and release a NOS-inducing soluble factor  
The Journal of Experimental Medicine (1995), 182, 677-688
- 3) F. Mannu, P. Arese, M.D. Cappellini, G. Fiorelli, M. Cappadoro, G. Giribaldi and F. Turrini  
Role of Hemichrome Binding to Erythrocyte Membrane in the Generation of Band 3 Alterations in Beta Thalassemia Intermedia Erythrocytes  
BLOOD (1995), 86, 2014-2020
- 4) M. Cappadoro, G. Giribaldi, E. O'Brien, F. Turrini, F. Mannu, D. Ulliers, G. Simula, L. Luzzatto, P. Arese  
Early Phagocytosis of Glucose-6-Phosphate Dehydrogenase (G6PD)-Deficient Erythrocytes Parasitized by *Plasmodium Falciparum* May Explain Malaria Protection in G6PD Deficiency  
BLOOD (1998), 92 (7), 2527-2534
- 5) Giribaldi G, Ulliers D, Schwarzer E, Roberts I, Piacibello W, Arese P.  
Hemozoin- and 4-hydroxynonenal-mediated inhibition of erythropoiesis. Possible role in malarial dyserythropoiesis and anemia.  
Haematologica (2004), 89, 492-493
- 6) Prato M, Giribaldi G, Polimeni M, Gallo V, Arese P.  
Phagocytosis of hemozoin enhances matrix metalloproteinase-9 activity and TNF-alpha production in human monocytes: role of matrix metalloproteinases in the pathogenesis of falciparum malaria.  
J Immunol (2005), 175, 6436-42
- 7) Giribaldi G, Procida S, Ulliers D, Mannu F, Volpato R, Mandili G, Fanchini L, Bertetto O, Fronda G, Simula L, Rimini E, Cherchi G, Bonello L, Maule MM, Turrini F.  
Specific detection of cytokeratin 20-positive cells in blood of colorectal and breast cancer patients by a high sensitivity real-time reverse transcriptase-polymerase chain reaction method.  
J Mol Diagn (2006), 8, 105-12.
- 8) Giribaldi G, Prato M, Ulliers D, Gallo V, Schwarzer E, Akide-Ndunge OB, Valente E, Saviozzi S, Calogero RA, Arese P.  
Involvement of inflammatory chemokines in survival of human monocytes fed with malarial pigment.  
Infect Immun. 2010 Nov;78(11):4912-21.
